ABOUT THE CRSP U.S. SMALL CAP INDEX

The CRSP US Small Cap Index includes U.S. companies that fall between the bottom 2%-15% of the investable market capitalization. There is no lower limit in market capitalization, other than what is specified by investability screens. The index includes securities traded on NYSE, NYSE Market, NASDAQ or ARCA. Ranking days, the days on which eligibility rules are applied and on which pro forma indexes are created, occur after the market close on the first Friday of March, June, September and December. Reconstitution occurs quarterly after the market close on the third Friday of March, June, September and December.

Founded in 1960 to develop the first definitive measurement of long-run market returns, The Center for Research in Security Prices (CRSP) has long been an integral part of the academic and commercial world of financial and economic research. Since its inception, CRSP has partnered with the investment industry to develop and maintain databases and market indexes that are widely used by academics and commercial practitioners.

10-YEAR CUMULATIVE INDEX LEVELS AS OF MARCH 2015
