ABOUT THE CRSP US MICRO CAP INDEX

The CRSP US Micro Cap Index includes the smallest U.S. companies, with a target of including the bottom 2% of investable market capitalization. The index includes securities traded on NYSE, NYSE Market, NASDAQ or ARCA. By capturing the smallest companies, CRSP indexes encompass nearly 100% of the investable market. Ranking days, the days on which eligibility rules are applied and on which pro forma indexes are created, occur after the market close on the first Fridays of March, June, September and December. Reconstitution occurs quarterly after the market close on the third Fridays of March, June, September and December.

Founded in 1960 to develop the first definitive measurement of long-run market returns, The Center for Research in Security Prices (CRSP) has long been an integral part of the academic and commercial world of financial and economic research. Since its inception, CRSP has partnered with the investment industry to develop and maintain databases and market indexes that are widely used by academicians and commercial practitioners.

The historical performance statistics of CRSP's market cap indexes are based upon eleven years of backtest data from January 1, 2001 through March 31, 2011. Subsequent backtest was run with June 29, 2001 as the start date in order to align with the value and growth style indexes. As is common industry practice, CRSP backtest data does not include float shares. Descriptive statistics are based upon current index constituents. Backtest results are not indicative of future performance.
