ESG

CRSP has been producing indexes since 1966, helping academics and practitioners understand and research the trends in the financial markets. Drawing on this expertise, in 2011 CRSP designed and launched the **CRSP Market Indexes (CRSPMI)** product line to provide a comprehensive suite of efficient, transparent and representative benchmarks that cover the entire U.S. equity marketplace. CRSPMI are investable, real-time indexes that strive to blend advancements in academic research with current commercial practice in a fundamentally sound manner under the premise that an index should reflect the way that money managers actually invest.

Anchored by the flagship **CRSP US Total Market Index (CRSPTM1)**, CRSP's current suite includes more than 44 capitalization-based, industry sector, value and growth style, and ESG indexes

CRSPMI distributes its investable indexes and related constituents, corporate actions and rebalancing information to a broad community of licensed clients over multiple delivery channels, including direct client feed, secure website and approved third-party redistributors.

CRSPMI have over \$2 trillion in linked assets.

INDEX ELIGIBILITY

Companies become public through IPOs or other business transactions, such as De-SPAC. CRSP evaluates the new issues to be considered for index inclusion based on several factors:

- **Domicile Eligibility** – identify US companies and exclude non-US companies that are not eligible
- **Investability** – identify companies that have sufficient liquidity based on trading volume, float shares, market cap and other relevant metrics
- **Seasoning** – for companies identified as Micro Cap, the company should have at least 20 trading days; for companies Small Cap or bigger, the company should have at least 5 trading days

CRSPMI does not apply profitability tests or any other such qualifiers for potential inclusion in the index, nor are CRSPMI products held to any set number of constituents (no 100, 500, etc.). During each quarter, CRSP evaluates new listings and IPOs on a continuous basis and fast-tracks qualifying new constituents into the indexes within 5 days of listing. Additionally, each calendar quarter, CRSP indexes review the entire investable U.S. equity universe, and incorporate domicile eligible and investable new issues during the reconstitution process, in order to continuously best represent the US equity market.
